Prebiotics are 100% natural dietary fibers and can be found in many popular foods such as onions, leeks, bananas, artichokes and tens of thousands of other plants. Prebiotics help your body "naturally" maintain a healthy digestive system by "selectively" stimulating the growth of healthy bacteria (probiotics). Simply put, prebiotics are food for probiotics. **Probiotics** are beneficial bacteria that live in our digestive tract. Probiotics help maintain a balance between beneficial bacteria and harmful bacteria
